Hey folks,

My wife and I are doing a two week trip out west in July and have ended up renting a cabin outside of Durango for a long weekend. We would love to do some hiking up into the San Juans and hopefully do some trout fishing. I know the Animas River is supposed to be spectacular, but I was wondering if anyone else had any suggestions for places to fish and places to hike. We'd love to find a trail that takes us up into an alpine meadow with a small trout stream....

any ideas?

Thanks so much!
