ACE, manages the FEW for flood control sothey only let the dam get to 1370 before dumping water to preserve capacity. After that there really isn't any provision for fishing management even though they wrecked a good brook trout fishery to build the dam.

ACE does manage for rafting and kayaking, and there's very limited good fishing in the summer because allthe cold water is released by summer's high temperatures.

Could it be better managed? YES, absolutely, but ACE won't do unless they are bombarded by letters asking for a change in management, or the PFBC asks as much. It's our water not theirs. we have the power to write letters, let's do it!
