Ed,

Not this week but could make it happen next or another. Problem is, with one child away, wife is working fulltime in the summer and she gets out of the home early ... I send my son off to camp most days. That means I'd get up to the LL arnd 9:30 ... Fish still risen to tricos arnd that time?

She does have a handful of summer fridays so we can look at those as well once I know. Also def plan on being at the fish and chips and being up there EARLY!

Tried fishing so dries and def can uses some casting help .
