I've been using P-Line 100% fluorocarbon, 2# test for 8 months months as tippetts when fish midges and small nymphs. I find it to be very supple and fairly abrasion resistant. Streamerguy: P-Line has coated fluoro but they also sell 100 % fluoro, that's what I have. I also use their 4 pound test fluoro when fishing larger stuff and when building leaders.

For those anglers using fluoro, the price is right.
