What kind of rating did you get for the punch?

Off scale... Or at least thats what I saw... I had tears in my eyes....Lol! It was up toward the top of the scale. I have no clue how accurate they really are. I knew somebody was gonna ask that question. I guess I'm not a kid any more although I still act like one every now n then. Doc told me that if I had hit a heavy bad I probably wouldn't have had the tear. Just a broken hand.
