I do a lot of fishing in the warmer months so I tossed the vest years ago. I literally no longer own a vest. I bought a cheap chest / sling pack. White River from Bass Pro for \$30.

I wear it as a sling pack, its more comfortable and out of the way behind me. I don't know how people can wear vests in summer months. Its small but holds three medium sized boxes, two smaller boxes, a half dozen spools, and just about anything you would put in a vest.

When I really want to travel light I wear my four pocket Columbia fishing shirt, light weight cargo shorts and I carefully select what I want to bring and a selection of fly patterns go in one or two boxes fit in my pockets
