I use a vest and take way too much stuff. It's not bad when fishing big creeks and rivers, but it really isn't necessary when I fish small streams. I recently bought a Simms backpack that I am going to use for small streams. I always need lots of water when I fish so I need something to carry my water bottles. I'm going to try the backpack this weekend. I will only need some attractors, tippet, hemos, and floatant. That should cover it. My back is going to thank me this weekend.
