Unless all the water freezes, it should not read 32 degrees. Maybe 33-36. Bureau of weights and measures or two or three other thermometers should get you close enough.

If there is anyone here who has an absolute temp at which they will not fish, please step forward. When I say absolute, I mean, even if you travel all day for a 5 day trip. Otherwise, consider fishing early in the AM, or very late at night, or cancel the trip altogether.
