All good suggestions above.

To tie decent flies, I suggest you use a well tied fly as a template. Note the materials, proportions, etc. Keep tying that fly until you can replicate the template fly. The techniques you master can be used when tying many other patterns.

[Charlie's Fly Box](#) is a great site to use for tying many patterns. Use the link to tie you pheasant tail pattern. I would bet, after tying 6 or 8 flies, they will start to look a lot like the pic in the link.

Flies need not to be perfect. As long as you use good technique, the flies you tie should be fishable.

Good tying.
