Now that I think about it, I don't think I tied a good clinch knot. I'm sure the 5X didn't help but it was a situation were I was not expecting anything that big. I suppose I should start expecting the unexpected.

Here is where I think the knot failed (lets see if I can describe this) First, I dont think I wrapped it more than 4 times. Then I went through the bottom loop (at the hook eye) ...HERE IS WHERE I SOMETIMES MAKE A MISTAKE...when I go to pass the line back through the top loop of the knot, sometimes the line will wrap 360 degrees around the knot before I pass it through the top. I know this is not exactly correct but I never thought it mattered...until now. (does this make sense?)
