This is a serious question. Do people tie these just for looks and tge challenge or do tgey actually fish these? They look cool but wasnt sure if u actaully used them to catch fish. No disrespect, a serious question.

This set is more of an artistic variation of another set i posted a while back (Carrie Stevens Patriot Series, which you can see [here](#))

The stevens flies were tied for fishing (specifically, trolling), but can also be tied smaller and shorter for casting.

They were developed primarily as fishing flies, though nowadays, mostly i tie them for display purposes.
