If I haven't used snowshoe fur, then its been Superfine...
...Its also very easy to use due to the fiber length and thinness...

Plastic dubbing from a traditionalist? I'm shocked.

Try Nature's Spirit Fine Natural Dubbing.

It can be applied even thinner than "Superfine" and, when wet, has a great translucent appearance that polypropylene lacks entirely.

This is how it starts... Next thing you know, you'll be using a boron rod and a Lamson reel...
