Fished the Breeches on Saturday. Started at the bottom of the fly area. Allenberry Section crowded as usually. Not much surface action so i resorted to junk flies. Ended up with several browns and a nice bow. Moved above the mill dam and got surface action on beetles. Picked another nice bow on a sucker spawn but then the weather threaten to drench me. Made it to the car about 7 pm feeling somewhat cheated, but satisfied overall in the day's fishing.
