Mine is older than Heritage Ed's. It's a Traveler 2000 and it's 20 years old +/- . It's the older screw type, which was later replaced by the cam. I've tied size 4/0 down to size 32 with it, and it works the same as the day I bought it.

Wow, that's a whole lotta flies! (that's enough to shoot out a dozen to every registered member) 😄
