- except maybe for walking in waders. 😊

You had to go there, huh! Okay just for that no more entertaining falls while you are around!

Seriously I know exactly what you and Tom were saying. It was implanted in my brain except when I got to smaller flies which seems stupid when I sit back and think it through. The drift should be even more crucial on smaller flies, some people are just thick headed (which helps when you hit your head when you fall 😊 ) I guess.
