I just have a glass one. Comes in a little crafty black tube. I think it cost me \$6.00.

If I buy a fancy shmancy \$12 one, I'll lose it.

I purchased one of these from Cabela's and it doesn't seem to take very accurate readings, in fact I'd go so far as to call it horrible.

It's probably a good idea to test any thermometer you buy with the ice water method before trusting it to take accurate temperature readings, especially the cheap ones.
