I don't have any experience with Whiting Herbert miner Pro grade. I would think that the Pro grade is a cosmetically lower grade. It sounds like you get a price break because the hackles are not a uniform color.

I am going to recommend that you buy the saddle. With the Whiting 100's you pay a steep premium, which is fine if you have more money than time, or need to have the feather labeled with the hook size.

I bought high grade whiting saddles long ago and am still tying with them.
