afish,

In the Spring creek canyon example, was I technically in violation?

Bait on person. Walking to fish a place where bait is allowed. But the only access was past FFO section, which was not fished, just walked past. The path, however, gets closer than 25 ft to stream in FFO section.

WCO said I was fine, though he might have been exercising leniency. And of course, today, you can access that stretch from the top without going past FFO area. But back then, the posted stretch prevented that.

Yet another reason to get rid of FFO sections.
