DJ, now that I've been tying for many years, I think the smaller flies are easier to tie. Harder to see (both on the vise and on the water) because years of experience also means you've aged and the old eyes ain't what they used to be! But if you can tie them and see them and hook a fish on them. NOTHING LIKE IT!

Game on! 🎮

Both of these were caught on my tricos and neither came to hand easily but damn were they fun!
