well come hell or high water i'll have two of those three things listed and a good few of these for tomorrow's adventure. my only question are my sz 20's small enough. the only thing i have to compare it to is the if i remember correctly sz 22 that volkenurse gave me at the jam. here they are left to right, a pattern i found in youtube(tails will be getting changed), the one i got from volkenurse, and a bare sz 20 hook i have a dozen or so of.

DJ, I can only tell you I tie and was using size 24. Last year I got away with 22's but 20 may too big although you could use the size 20 and tie them smaller as if they were 24's.
