URL:

Took my daughter 2 down to the pond behind the cabin, threw out a spinner and felt a small hit handed her the rod and she ran to her mom and pulled this out of the pond. Not sure if I would call it fishing but she got one. Put out some trail cams and found what got into the bird feeder 5 foot from the cabin, picture was take 20 yards from the pond. Fished the stream for about an hour got into some nice fish, but it was a family weekend so did not stay out long.
