I've not been up there in September so I'd check with the rangely sports store, but I think caddis and bwo's should be hatching.

The brookies will be in their spawning colors and I think for both them and the landlocks folks will be swinging streamers or bombers for the meat eaters.

Unlike the flatlands streams most of the big fish will be holding in pocket water and deep fast riffles rather than your typical placid pool.

Fish the seams and eddys, in front of boulders etc with Wulffs, humpies, ehc 's and irresistables if you want to use dry flies.
