URL:

I stopped by the local Wally World so my son could browse the Hot Wheels and Legos. While he was in the toy section, I went over to the fishing section which is usually a waste of time and found 1 box with a float tube in it. Rack said \$78.00. I thought it would be great for my son. I quickly Googled it and their website has it for \$58.00. I took it up to the register and the clerk matched the online price. My son uses an extra pair of snorkeling fins and the new float tube on a local pond for some evening bass bugging.
