I guess some would be coming from the nearby rivers(The V, Black, Rocky, etc.), but most of them I believe come from the lake. Some of the walleye and perch guys actually get pretty mad because I guess the fishing slows down since the fish now have a new food source.

I remember going to a Browns game(pre-season, so it was during late Aug.) and the hexes were all over the stadium! It was crazy. If the big lake run smallies were still in the rivers I'm wondering if they'd be eating on top? 4-5lb smallies on hexes would be awesome.
