So I was at Cabelas In Hamburg last week and impulse bought a tfo bvk at a good price in 10' 5 weight. I really liked its castability but since I am rather new (less than 2 years) into fly fishing, what should I expect to use this rod for. I like the way it yard casts but have yet to take it to the water with all the rain here in nepa...can I fish dries with this or is it a strictly nymphing stick? Thanks and I hope everyone enjoys the weekend!
