There are some great resources out there. You can easily do some stuff to just preserve a bucktail. The first book listed below gives great tips for deer, rabbit, birds, etc. i have followed this book for deer, fox, muskrat, mink, and pheasant. enjoy!

Here are 2 books I own that are useful.

From Field to Fly by Scott Seymour

-cost is less than \$10 on Amazon

[Amazon - From Field to Fly](#)

Dyeing and Bleaching Natural Fly-tying Materials by AK Best

- little more pricey, around \$40 on Amazon. I think I got mine cheaper on eBay years ago.
