The River is real high right now, like all the rivers in the east. The water is spilling over the dam (Cannonville) and the WB is high for even floating and unwadeable. MS too high for even floating.

Check these sites for info:

[http://waterdata.usgs.gov/ny/nwis/uv? ... 0065=on&cb\\_00010=on&cb\\_00](http://waterdata.usgs.gov/ny/nwis/uv? ... 0065=on&cb_00010=on&cb_00)

Thanks for the sites; it seems like the Delaware may be coming back down. I can only hope bc we plan on going out at the end of next week.

Thanks again!

TC
