I have a chest pack, and will probably still use it. But I have it full now, and still need more space. And I'd rather put more weight on my shoulder than my neck. Even if I only took one box, it would be tough to fit a bottle of water.

I'd have to see the gale force in person but I don't love the looks of it. I saw the Orvis safe passage sling and it was backwards. The Vedavoo looks like what I had in mind. Thank you. Anymore options?
