I went to Cabela's 2 weekends ago to test a few rods out. I was interested in buying a 6 weight to fish bigger waters for trout and warm water fish. The fly shop guy said that before I try any other rod, that I should try the Sage One. So he rigged it up and outside we went. I was blown away how easy it was to cast and its accuracy. I could easily cast the entire fly line with precision....I bought it.

I tried it out the next day on the Huron River in Ypsalanti, MI. Within minutes I hooked into a monster smallie. It's just an awesome rod. Sure I should have tried other rods, but I haven't regretted the purchase one bit.
