I've never fished for anything but trout with a fly rod but figured I would like to give it a try. I have a 6wt with a sink tip line I use for throwing streamers for trout, and was thinking I could at least try this for smallmouth. Was wondering what streamers you warm water guys use to target them? Will general trout streamers like wooly buggers, scalpin, leeches, etc. work? If not any suggestions...

I'm looking at trying the Lehigh. Thanks
