They will damned near take anything. All of the above thats been mentioned and just about anything you'd use for trout. Some of the biggest bass I've ever caught have been on an Adams dry. I use Muddler minnows a lot for them. 10lb or better mono and 5X tippet or bigger if your fish'n weed beds. It doesn't have to be fancy. The 6Wt will work fine for you. I usually use a 5Wt but that's just me.
