stal42, how far are you willing to drive? Don't know of any places near Pittsburgh, but I fly fish for carp a lot on the Shenango with good success. Neshannock has carp also(and nice ones at that) but I've never gotten one to bite there. Really want to try to figure them out this summer. Also know of a stream in New Castle that has some. It's a small creek, but if you're already out by Neshannock it may be worth a shot on the way home/there.
