Tyger, speaking of Frog's Fanny, greatest stuff I've used since the first generation Orvis Superfloat (which to this day I still say was the best floatant ever, of course it had CFC's in it so it wasn't good for the environment). At \$6 a bottle for Fanny I would go broke because I can honestly use a full bottle in a good day's dry fly fishing. I use it quite liberally. For those of you who like this stuff, check out ebay. Guy sells it by the quart for about \$20. I can fill my bottle over 50 times with a quart. Glad you had success with the pattern.
