Thick thick trico hatch on the main perkiomen last weekend. Was on the creek by 630 or so and they picked up soon after that. Lasted til 9ish as well. Water was quite warm though and I didn't catch anything but a bunch of fallfish or chubs or whatever they are. Saw some larger splashes on the top but they weren't taking what I was throwing. Was still pretty cool to just be out there and witness it though. Between knoll and legion for reference.
