Thanks for all of your kind thoughts. I was fishing and for no reason decided it was time to quite. I got out of the creek and just finished putting my gear in the car when I started to feel a slight pain in my chest. Then wham I broke out into heavy sweat water was pouring out of me. I drove home about 12 or 15 min, and just made it. Collapsed into a chair told my wife to get me asprin that I thought I was having a heart attack. Total blockage of an artery. DR said if I had waited I would not have made it. I still have two other blockages but they think they can manage them with meds.
