glad we got to fish it this past weekend, we just got about 3 or 4 inches of rain in about 45 minutes, I bet that creek was raging!  
not to mention the tornado that was spinning around that area!

That area sure would have been dangerous to be in this afternoon/evening. Not like it isn't already dangerous enough.

I still may check out that smelly stream next time I'm down there just for the heck of it. I'd be happy with a minnow, but more than likely I'll catch the skunk 😊
