I'm in the same boat as pretty much everyone else. Whenever I'm fishing with other people it's usually more relaxed and we're less serious about the catching. Fishing with my brother is an exception though as the competition can get pretty heated haha. Now WHO catches more fish when I'm fishing with others? Usually depends on the water and who's more familiar with it, but most of the time I have home field advantage ;)

Yeah, when I fish by myself I have the ability to stretch the truth, but I honestly do catch more fish. Like everyone else I concentrate more on the fishing when I'm alone.
