So you went all that distance to catch wild brown trout??? 🏆

What's interesting is that in many of your shots, I could see myself on one of PA's many trout streams. Of course the ones at the end certainly aren't PA, but pick a high gradient stream and it's not far off. I think we're blessed in PA to have such diverse waters to fish. In the long run, it probably prepares us to fish any waters in the world.

Nice shots.
