Minumum size 22 cm. That's 8.6 inches.

All were undersize. Well, I mean, not ALL. The one's that were of legal size, well, you know, we tried to keep them, but they all seemed to flop free at the last minute. Oh well. ;)

Caught probably in the high teens. Missed or lost just as many. Action wasn't steady, things would be pretty cold for a while and then bam, bam, bam, you hit a hot streak.

It is club water, which is the only reason I was able to fish for trout on a Thursday. Other trout fishing is off limits.

My guide was Pascal from <http://upstreamflyfishing.com/>. Great guy. If anyone goes that direction, I highly recommend. Speaks perfect English too. He's got plenty of options, limited only by law. I chose the small stream thing so if that isn't your thing, don't be put off. Just let him know what you're looking for.
