When I first started tying I picked up a couple of these imported necks in badger and brown. The most expensive one runs \$7 and some change.

They're not the quality of the more expensive necks but they'll get you cutting your teeth on dry flies, the flies will float, and they will catch fish. I still use them from time to time on certain patterns and for the money I don't think they're a bad investment.

All of that being said, you will appreciate better quality hackle when you get it.
