Don't need a receipt. I emailed them told them the problem and they said to send them back. Your box should have come with a preprinted UPS label to return them. I had the same problem with a leak in the boot part. If you want the same pair, just buy replacements online and return the leaky ones with the UPS label and box that comes with them. I've done it twice and am about to do it again. They are great. You will get 100% back including the shipping even though their instructions say the shipping charges back will be deducted.

Okay, off to the San Bernardino's to fish the wrong coast. Look for my report later. 🍷
