FWIW, that same list is located here in google maps form.

<http://maps.psiee.psu.edu/preview/map.ashx?layer=986>

While there are a few, NW PA has a lot of wild trout streams, and relatively few class A's. Thus, I much prefer the natural reproduction list for that area. Which can be found here:

<http://maps.psiee.psu.edu/preview/map.ashx?layer=980>

Now, this doesn't give species. In generalities, north and west of the Allegheny is mostly browns. South and east is mostly brookies.
