I use an 11.5', 8 wt switch rod on the Oak and the Salmon Rivers. No problems with using that rod, however, like was mentioned before, finding room to swing flies can be problematic. But it can be done. You can always use it as a single handed rod and bottom bounce. Don't count on using it on any of the smaller tribs. Good luck when you go. BTW the brown in my avatar was caught with the switch.
