For you guys that are close, you can always come down and fish the Gunpowder. It has been ranging from 50 - 56 degrees, and with all of the rain we have had, there have been some releases. Keep an eye on the flows - right now it is at about 57cfs, but with a release this time of year, it can get up to 70 or even 90. The closer to the dam you fish, the better. The extreme lows in the dog days are around 35, which makes it essentially non-fishable.
