Patrick: If you are interested, here is a reading list of texts to get you started:

David Rosgen, "Applied River Morphology" 1996 Wildland Hydrology, Inc. Pagosa Springs, CO

F. Richard Hauer and Gary A. Lamberti, "Methods in Stream Ecology" 2006, 1996 Elsevier, Inc., Burlington, MA

Luna Leopold, et. al., "Fluvial Processes in Geomorphology" 1964, 1992, Dover Press, Mineola, NY

The first two I received as class textbook materials, so I'm not sure they are generally available. The Leopold book is available on line through Dover Press.
