Great video by the way. What do you use for the background to get the light blue color. Great step by step as well.

I just have a light blue binder that I stand up behind my vise.

What other colors do you have success with. I have yet to tie them with chennile and was wondering your go to colors. I purchased a ton of different colors from pearl and crystal to barred color variations. I did come across a barred color that is yellow with dark amber barring that i have been anxious to try.

My favorite color would probably be yellow.
