Hello all,

I'm headed to Altoona to visit family over Labor Day Weekend and plan to fish at least one day. I'm not familiar w/ the gorge section from Spruce Creek to Barree but I'm interested in floating it with the kayak. Anyone have any input/advice?

What cfs/height is too low to float and too high to be safe?

I most likely will be solo w/ my truck only ..... how is the walk back from Barree bridge to Spruce Creek Church? Can i safely take the train tracks back (looks to be an old tunnel ..... is it passable?)?

Anything anyone is willing to share would be greatly appreciated.

Thanks in advance,

Ryan
