Thanks for the flow info - perfect. Wouldn't be carrying the boat - my plan was to either tie the boat up at the church and drive the car to the bridge and walk back and float down or float down and tie the boat up at the bridge and walk to retrieve the truck. Sounds like either way i'd be rolling the dice. Any other alternate routes to walk this stretch? I'm trying not to enlist/inconvenience family members to shuttle me down early in the AM.

Thanks.
