Competition Fishing on Spring Creek

There is a comp on Spring Creek this weekend during the worst heat wave of the year. Isn't there a lot of guys on this forum against fishing for trout during the middle of summer. Don't the trout have a hard enough time surviving the heat and the elements that summer brings without twenty fishermen going after them just for some bragging rights and ego boosts. Are these comps that important ??? I understand Spring Creek stays fairly cool. But when is enough enough ???
