OK so I am making this up as we go...and can use any help possible, i am not reallt familar with this river 1 float so far. I plan to stay friday night at Pittman Riverside gampground, I hope to get there mid-afternoon friday and get my tent pitched and camp made. My thought was to use that as an end point friday eve. I thought that could be the meeting point friday afternoon (entrance to the campground) from there depending what time we get started we we would select a put-in spot. The campground looks to be just under a mile downstream from rt 17 in millerstown. I'm not sure where any spots to put in are besides Thompsonville. If we get started around 5 or so 2 miles would be a good stretch to slowly work down and fish.

This is just what I was thinking...any other thoughts?

As for Saturday the plan is for 6 miles from Lewisville downstream, I have my locations picked out for that. Hope to hit the water around 6:30 at the latest, start meeting up at river access road around 5:30, so we can run some vehiles downstream
